Professional summary

Fullstack/Frontend Developer with nearly 3 years of commercial experience in building scalable web applications and complex ERP/MES enterprise systems. Specialized in the Angular ecosystem, Monorepo (Nx) architecture, and performance optimization (Signals, RxJS). Possess practical backend knowledge (Java / Spring Boot), aiming to transition into a Fullstack Developer role. Committed to Clean Code, modular architecture, and effective team collaboration.

Technical skills

- **Core Technologies (Frontend):** Angular, TypeScript, JavaScript (ES6+), RxJS, Angular Signals, HTML5, CSS3 / SASS
- **State Management & Architecture:** Monorepo (Nx), NgRx, Microfrontends, Standalone Components, Modular Architecture
- **Integration & Networking:** REST API, HTTP Interceptors
- **Backend & Databases:** Java, Spring Boot, Spring Data JPA, Hibernate, Maven, PostgreSQL / MySQL (Junior level)
- **Tooling & DevOps**: Git, GitHub Actions (CI/CD), Docker, Nx CLI, Webpack
- **Best Practices & Quality:** Clean Code, Responsive Web Design (RWD), Unit Testing, Performance Optimization, SEO

Professional experience

Frontend Developer | MuddyCode Sp. z o.o. *January 2024 – September 2026*

Worked on the development and maintenance of a multi-module enterprise ERP system in a Monorepo (Nx) architecture using Angular, TypeScript, RxJS, and Angular Signals.

Modern Architecture & Advanced Mechanisms:

- **MES (Manufacturing Execution System):** Built a real-time production monitoring and control system (worker time tracking, job order control, material consumption tracking, and operation status updates) using RxJS and REST API.

- **State Management & Reactivity:** Refactored and optimized performance across key modules by implementing Angular Signals and Standalone Components architecture.

- **Authorization & Session Management:** Implemented secure login mechanisms, session recovery, token expiration handling, idle timeout based on user activity, and HTTP Interceptors for automatic token refresh and request cancellation.

- **Data Services & CI/CD:** Developed dynamic Query By Example (QBE) queries, streaming file uploads/downloads with progress tracking (XMLHttpRequest progress events), and co-created CI/CD pipelines (GitHub Actions).

ERP Business Modules Development:

- **PMS (Production Management System):** Created production technology logic, release versions, job order master data, pricing calculations, and dictionaries for tools and workstation rates (using custom project-specific tools as well as PrimeNG / Angular Material).

- **Commercial Module, WMS & LOGS:** Implemented contractor dictionaries, price lists, WMS index group management, and integrated a system log module for application event monitoring.

Dedicated SPA Applications & Web Services:

- **Quick Atest:** Designed and deployed from scratch a Single Page Application (SPA) streamlining order documentation creation, data filtering, Excel report generation, and PDF file merging.

- **Optimization & Web Services:** Maintained and optimized company websites (including Familiamed), improving performance and SEO metrics.

Education

B.Sc. in Computer Science (Software Engineering) *October 2026*

WSB University in Dąbrowa Górnicza

Courses & certifications

Fullstack Developer Bootcamp | Kodilla *January 2023 – December 2023*

- Practical training in HTML, CSS, JavaScript, React, Bootstrap, Redux, and Node.js.
- Covered unit testing practices and completed 3 practical projects (2 individual, 1 team project).

Languages

- **Polish:** Native
- **English:** Upper-Intermediate (B2)
